Pranjal Varshney – Golang Developer

☎ : +91-9258545457 | : pranjalvarshney898@gmail.com | Gurgaon, India | LinkedIn | Github | Portfolio

Software Engineer specializing in backend development with 2+ years of experience in building Go commands, making code efficient by doing unit testing, ensure automated deployment using AWS Cloud, RIO pipelines, enhanced security using Docker, maintaining k8s, terraform and YAML files. Skilled in converting legacy scripts to optimized Go-based services.

TOOLS & TECHNOLOGIES

Languages: Golang, Python | **Database:** SQL | **Container Platform**: Docker| **Frameworks & Tools:** Cobra CLI, Gin, PySpark, Kubernetes, Helm, Terraform, CI/CD, RIO | **Version Control:** Git, GitHub | **Platform:** AWS |**Others:** YAML/JSON Handling, HTML, CSS, OOPS, RestAPI, CRUD Operations.

PROFESSIONAL EXPERIENCE

System Engineer | TCS — Gurugram, India | Jun 2025 – Present

- Designed, developed, and maintained scalable backend services using APIs, Gin and Golang (Go).
- Developed, executed, and maintained unit and integration test cases to ensure high software quality and code reliability.
- Involved in daily stand-up meetings as a part of Agile Methodology.

Assistant System Engineer | TCS — Gurugram, India | Jun 2024 – Jun 2025

- Designed, developed, and maintained Golang cobra-cli commands, backend services with Apple Client, improving system reliability by 20%.
- Engineered 2+ CLI tools using Cobra, automating AWS configurations and application deployments, reducing infrastructure provisioning time by 60% and minimizing manual errors by 40% across teams.
- Maintained robust CI/CD pipelines, automating the build, test, and deployment processes, leading to a 40% reduction in deployment time. Deployed containerized applications using Docker and orchestrated them with Kubernetes, while managing deployment configurations through Helm charts.
- Managed configuration files and automated workflows using YAML and JSON for infrastructure and application deployment.

Assistant System Engineer Trainee | TCS — Gurugram/Trivandrum, India | Jun 2023 – Jun 2024

- Developed hands-on experience in Python programming, SQL database management, object-oriented programming (OOP) concepts, and Agile software development methodologies.

Python Programming Intern | Internshala — Jun 2019 – Aug 2019

- Developed GUI applications using PyQt with SQLite integration.
- Applied Object-Oriented Programming principles in project development and making code 50% more efficient.

EDUCATION

- **B.Tech – Computer Science** | Aligarh College of Engineering & Technology| 2018-2022| 84.5%
- **Intermediate** | Maharishi Vidya Mandir, Aligarh | 2017-2018 | 75.6%
- **High School** | Maharishi Vidya Mandir, Aligarh | 2015-2016 | 8 CGPA

CERTIFICATIONS

- **AWS Cloud Certified Practitioner**
- **MySQL Essential**
- **Go: The Complete Developer's Guide**
- **Git/GitHub Training**

PERSONAL PROJECT

Banking Application in Go with Cloud-Native Architecture

Jun 2025 - Present

Built a scalable, cloud-native banking application using Golang to manage financial transactions and data efficiently.

Read more here and also see my github page for other projects.
